

# Section Traffic Information For Operation North Wind

Duty Roster for NTS support of Virginia SET Saturday:

ODEN/C NCS 0900-1030 KV4AN  
ODEN/C NCS 1030-1200 W4TY  
TRAFFIC TX 0900-1030 KV4AN  
TRAFFIC TX 1030-1200 W4TY  
TRAFFIC RX 0900-1000 WA0WHT  
TRAFFIC RX 1000-1100 N4ABM  
TRAFFIC RX 1100-1200 K4OSO  
ODEN/A LIAISON \*\*NEED VOLUTEER\*\*

Other stations are welcome and encouraged to check in and receive traffic.

RX STATIONS DO NOT DELIVER TRAFFIC IT IS SIMULATED

ODEN/C net frequency is 3578.5 KHz with 7050 KHz as backup.  
December 9<sup>th</sup> from 0900 to 1200, the Virginia Section is running a Simulated Emergency Test.

---

Here is the support needed from the NTS:

1. A station to check in to the ODEN/A net on 3947 KHz LSB and inform them that the ODEN/C (CW) and ODEN/D (Chip64) nets are operating on 3578 KHz to accept H&W and logistics traffic. That station will be the Liaison between ODEN/A and ODEN/C/D nets.
2. A station or stations to act as NCS of the ODEN/C (CW) and/or ODEN/D (Chip64).
3. A station or stations who can receive H&W and logistics traffic via VHF Packet from the VDEN and take the traffic to the ODEN/C or D net.
4. Stations to receive (but not deliver) the simulated traffic on ODEN/C and/or D nets.

Please send me what role you want and what times you are able to support. The SET is 0900 to 1200 on December 9<sup>th</sup>. Respond as soon as possible and I will create an NTS Duty Roster.

---

There will be a special session of the Virginia CW Net Saturday morning from 0900 – 1200 for the Virginia Simulated Emergency Test.

The Virginia Net will be activated as the Old Dominion Emergency Net / Charlie (ODEN/C) in accordance with the Virginia Amateur Radio Emergency Services (ARES) Plan.

The ODEN/C will use the same frequency as the VNE and VDN, 3578.5 KHz. Alternate frequency will be 7050 KHz.

The exercise will simulate 80,000 motorists stranded in a snowstorm along I-95. The ODEN/C will handle all the Health and Welfare traffic and get it into the NTS. STATIONS RECEIVING TRAFFIC SHOULD NOT ATTEMPT TO DELIVER IT.

The ODEN/A, SSB net will operate on 3947 KHz.

Hope to hear you on the ODEN/C Saturday morning from 0900-1200 and support VA NTS.

73,  
Steve  
KV4AN  
Virginia Section Traffic Manager
